

Water Heating

Air Conditioning

Energy Saving

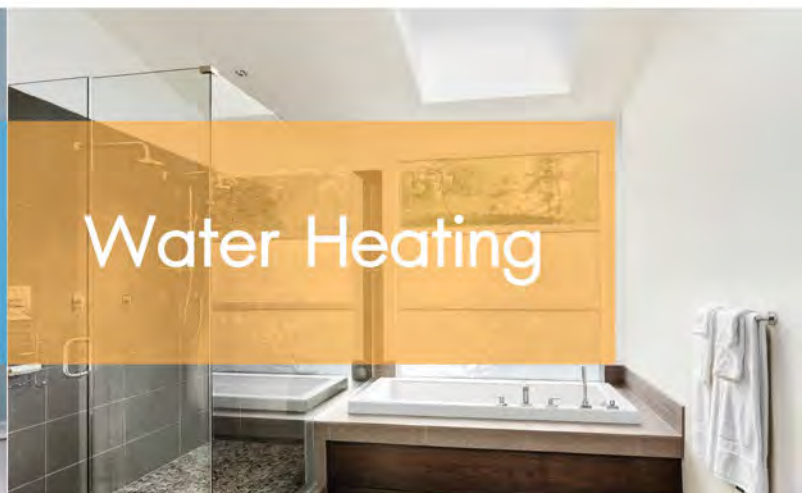

www. **pac**.co.th

PAC is an innovator and developer of energy saving water heater and air conditioner products. PAC technology is mainly focus on waste heat utilization and energy efficiency. We aim to save our customer's electricity cost and reduce an environmental impact.

“ENERGY SAVING SOLUTIONS
for WATER HEATING
AND AIR CONDITIONING ”

PAC has continually researched and developed new innovations focusing on energy saving and environmental friendly water heating and air conditioning system . We proud to be a leader in these innovations in Thailand.

- Thailand Eco Design Award 2012 – Royal Award from Her Royal Highness Princess Maha Chakri Sirindhorn
 - International Invention Innovation and Technology Exhibition (ITEX) Award 2013, Malaysia
- i2P Contest 2013 (Innovation to Product Contest) – Department of Intellectual property, Ministry of Commerce.
 - Outstanding environmental product awards SME Thailand Inno Awards 2015
 - Seoul International Invention Fair (SIIF) 2013, South Korea
 - Premium product of Thailand Awards 2015 – Ministry of industry
 - 7 Innovation Awards
 - Thailand Energy Awards 2011 – Ministry of Energy
 - Pool Asia Environment Award 2011

PAC Products

PAC Frenergy

Water heater system which generate hot water by waste heat from air conditioner. Double energy saving, reduce 100% electricity cost from water heater and also reduce up to 20% from air conditioner.

PAC Pooltemper

Energy saving pool temperature controller which cool and heat the water for a pool from 10-50°C. Suitable for pool heating or swimming pool warming.

PAC Heat Pump

High temperature water heater which large volume water delivery. Four times more energy saver than general electric water heater. Durable and suitable for all heavy duty and environment.

PAC Hybrid Plus

Water heating air conditioner. Be an air conditioner and water heater in a same unit. Combine Inverter and VRF technology for the most energy efficiency in business which use both air conditioner and water heater.

PAC Hybrid Solar

Inverter and VRF air conditioner which consume electricity directly from the solar energy. No inverter used to convert the power. Free electricity cost in day time. Switch automatically to used grid power for air conditioning operation.

PAC Solar Aire

Split type solar air conditioner. Use electricity directly from the solar power. Reduce power loss from converter process. Smoothly mixed use AC and DC power to supply for an air conditioner.

PAC Eco Aire

Energy saving air conditioner. Can be design for all size of room and installation. Can be used with PAC Frenergy for higher energy efficiency.

PAC Klean

Air conditioning Cleaner in Spray, tablet and film type. Improve air quality and reduce smelliness. For your better health and longer air conditioner life cycle.
